Dear [BOSS],

As you know, we are looking to spend less time and money supporting underlying IT infrastructure and more time on areas that yield business and competitive value. For that reason, I am proposing that you send me to **Developing ASP.NET MVC 5** training, taking place **May 13 – 17th, 2019** at Pure IT Academy. With the content presented in the trainings, I plan to continue to strengthen my skills and walk away having learned:

- ✓ Designing the architecture and implementation of a web application that will meet a set of functional requirements, user interface requirements, and address business models.
- ✓ Creating MVC Models and write code that implements business logic within Model methods, properties, and events.
- ✓ Adding Controllers to an MVC Application to manage user interaction, update models, and select and return Views.
- ✓ Creating Views in an MVC application that display and edit data and interact with Models and Controllers.
- ✓ Running unit tests and debugging tools against a web application in Visual Studio® 2012 and configure an application for troubleshooting.
- ✓ Developing a web application that uses the ASP.NET routing engine to present friendly URLs and a logical navigation hierarchy to users.
- ✓ Implementing a consistent look and feel, including corporate branding, across an entire MVC web application.

This training will specifically focus on providing the inspiration, education and connections I need to be successful in my job. I will return with knowledge that can help the company in these areas:

- ✓ Competitiveness and flexibility
- ✓ Team communication
- ✓ Improvement in worker performance
- ✓ Consistency in duty performance
- ✓ Ensuring worker satisfaction
- ✓ Increased productivity
- ✓ Improved quality of service and products
- ✓ Reduced cost by lessen the outsourced service provided to us
- ✓ Reduction in supervision

I thank you for your consideration and look forward to hearing feedback.

Sincerely,

[Put your name]
